

Medication Refill Policy

We ask our patients to monitor their prescription medication closely and to check the status of their medication supplies before each visit.

We request that patients get their medications refilled at the time of their appointments, when possible, or to call a prescription in to their pharmacy several days in advance of running out of medication. We will review and respond to all medication refill requests as quickly as possible, however, **we require 72 hour notice to allow for processing**. Certain classes of medications may require an office visit prior to issuing a medication refill.

When in need of a prescription medication refill, **PLEASE CONTACT YOUR PHARMACY**. The pharmacy will communicate directly with our office and this will speed up the turn-around time for your refill.
